SUMMARY

Cybersecurity professional and SOC/MDR Analyst with hands-on experience in incident response, threat hunting, phishing investigation, identity security, and root cause analysis across endpoint, cloud, email, and network environments. Experienced in correlating telemetry from SIEM, EDR, identity, SaaS, and network security platforms to investigate suspicious activity, determine incident scope, and support remediation. Also building ObserveAgents, an AI agent runtime intelligence platform focused on visibility, detection rules, and control recommendations for AI agent behavior.

EXPERIENCE

SOC / MDR Analyst — QMasters

2024 — Present

Israel

- Investigate and respond to endpoint, identity, cloud, email, and network security incidents in a high-volume SOC/MDR environment.
- Investigate phishing attempts, malware activity, suspicious authentication events, account compromise, and endpoint-based threats.
- Perform log-based investigations using telemetry from Microsoft Sentinel, Microsoft Defender for Endpoint, Microsoft Entra ID, Microsoft 365, CrowdStrike Falcon, QRadar, SentinelOne, Netskope, Zscaler, Cato Networks, and firewall platforms.
- Correlate events across multiple security tools to identify malicious behavior, validate alerts, reduce false positives, and support incident response decisions.
- Investigate authentication and identity-related incidents involving Microsoft Entra ID, Okta, Active Directory, Kerberos activity, MFA behavior, and suspicious sign-in patterns.
- Produce clear customer-facing incident summaries, including investigation findings, root cause, affected assets, risk assessment, and recommended remediation steps.

NOC Engineer — Ness Technologies

2023 — 2024

Israel

- Monitored enterprise infrastructure and network availability.
- Worked with PRTG, VMware, CheckMK, and enterprise monitoring platforms.

EDUCATION

B.Sc. Information Systems

2021 — 2024

The Academic College of Tel Aviv-Yafo — Cyber Security Specialization

CERTIFICATIONS

- Check Point Cybersecurity Collaborative Challenge
- NX-212 Windows Forensics — Network Intelligence

PROJECT

ObserveAgents — AI Agent Runtime Intelligence Platform

5/2026 — Present

Designed and developed an AI agent runtime intelligence platform for visibility, discovery, and control recommendations. The system ingests OpenTelemetry/SDK traces and runtime events, discovers running agents and dependencies, maps tools/MCP/providers, and applies detection rules to identify risky behavior, unknown agents, failed workflows, and high-risk control candidates in a Gateway Control Center.

SKILLS

Threat Hunting, Incident Response, Detection Engineering, Malware & Phishing Investigation, Identity & Cloud Security, Root Cause Analysis, Threat Intelligence, SIEM/EDR Investigation, Microsoft Sentinel, CrowdStrike Falcon, Microsoft Defender for Endpoint, QRadar, SentinelOne, Microsoft Entra ID, Microsoft 365 Security, AI Agent Runtime Intelligence
Code: CPP, Java OOP, Python, SQL, GitHub

MILITARY SERVICE

Israel Defense Forces (IDF)

Operations Officer | Shift Supervisor | Air Defense Combat Soldier

- Managed operational activities and personnel in a mission-critical environment.
- Developed leadership, decision-making, and problem-solving skills under pressure.
